Overview

- Aspiring Data Scientist with a strong base in statistics, machine learning, and data visualization.
- Skilled in analyzing complex data, finding useful insights, and building prediction models to solve real-world problems.
- Interested in using analytical and technical skills in a data science internship, helping companies make decisions using data, and gaining practical industry experience.

Education

Qualification	University/School	Graduating Year	Percentage/GPA
B.Tech CSE	Amity University ,Jaipur	2028	7.32
12th	Gurukul Shikshan Sansthan sr. Sec. school, Sikar	2024	83.40%
10th	Adarsh Public School, Jhunjhunu	2022	84.33%

Projects

Book Recommendation System

- Developed book recommendation system using **Collaborative Filtering and Cosine Similarity**.
- Built ML pipeline using **Python, Pandas, NumPy, Scikit-learn**, and deployed using **Flask**.
- Generated personalized recommendations using user, book, and rating datasets.

Weather forecasting

- Built ML-based rainfall prediction system using **classification algorithms**.
- Performed **EDA, data preprocessing, and feature preparation** on historical weather data.
- Deployed prediction model using **Flask web application**.

Laptop Price Prediction

- Developed laptop price prediction system using **Regression ML models (~87% accuracy)**.
- Performed **data cleaning, feature engineering, and model training** using Python and Scikit-learn.
- Built Flask web app for real-time prediction.

Certification Courses

- Certified Data Science Course by **Code with harry**

Skills

Programming languages : python , SQL

Web Framework : Flask

Data Analysis & Visualization : Numpy, Pandas, Matplotlib, Seaborn

Machine learning : Scikit-learn
